

- endocytosis
- regulation of protein transport
- carbohydrate metabolic process
- endonucleolytic cleavage in ITS1 to separate SSU-rR
- small GTPase mediated signal transduction
- response to extracellular stimulus
- response to hormone
- myeloid cell differentiation
- positive regulation of response to external stimulus
- cellular response to cytokine stimulus
- regulation of phosphatidylinositol 3-kinase/protein kinase
- immune response-activating signaling pathway
- monocarboxylic acid metabolic process
- regulation of small GTPase mediated signal transduction
- regulation of intracellular protein transport
- small molecule catabolic process
- intracellular protein transport
- ribonucleoside diphosphate metabolic process
- regulation of DNA-binding transcription factor activity
- MHC class II protein complex assembly
