

- cytoplasmic translation
- cell morphogenesis involved in neuron differentiation
- MHC class II protein complex assembly
- hemopoiesis
- positive regulation of leukocyte cell-cell adhesion
- cell activation
- regulation of secretion by cell
- regulation of body fluid levels
- modulation by symbiont of entry into host
- body fluid secretion
- negative regulation of cell population proliferation
- positive regulation of immune response
- cellular response to cytokine stimulus
- ribosomal large subunit biogenesis
- response to growth factor
- response to ischemia
- negative regulation of nuclear-transcribed mRNA cat
- behavior
- Wnt signaling pathway
- regulation of plasma membrane bounded cell project
